

## MediCar – How vehicles can navigate around using LLMs

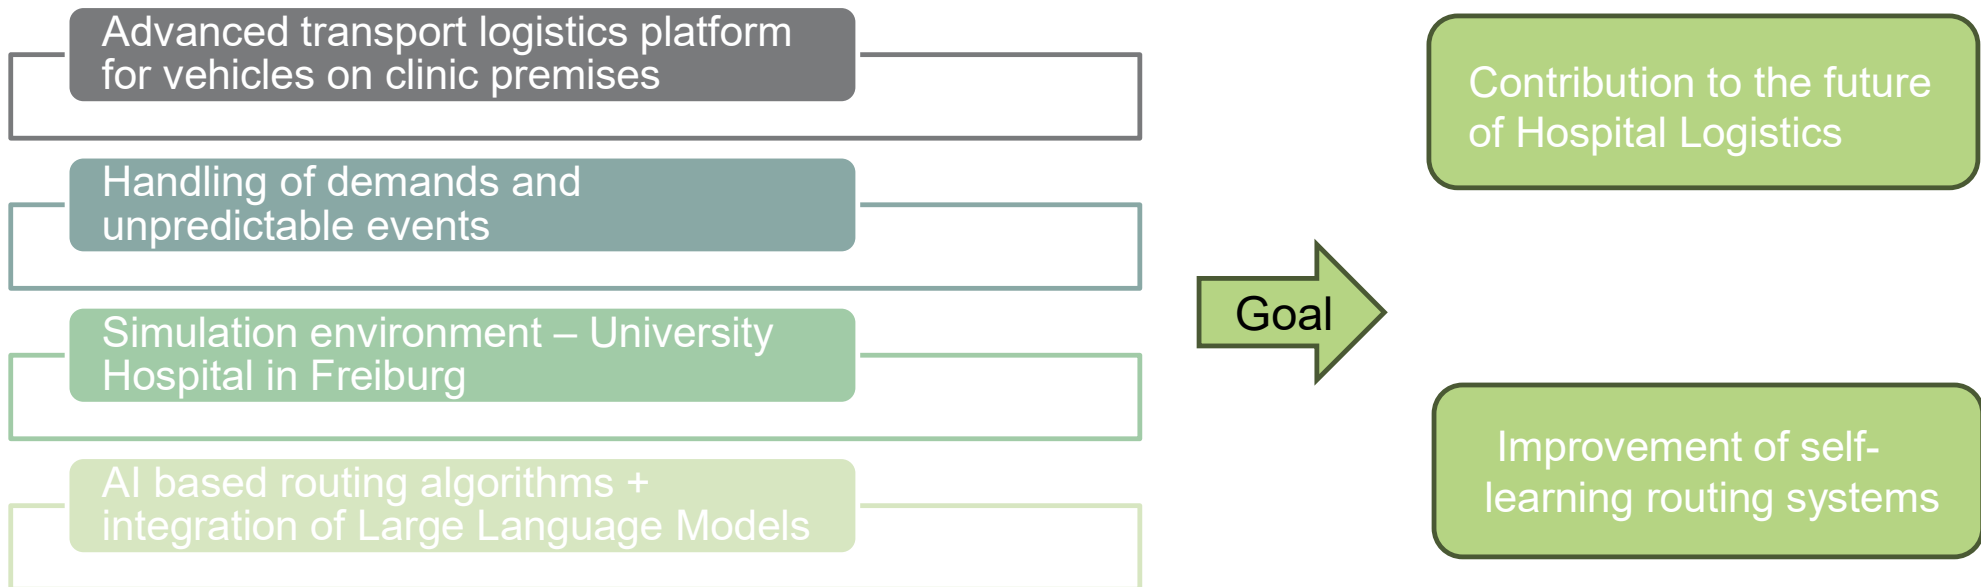

## 1) Project Description

## 2) Approach

## 3) Results

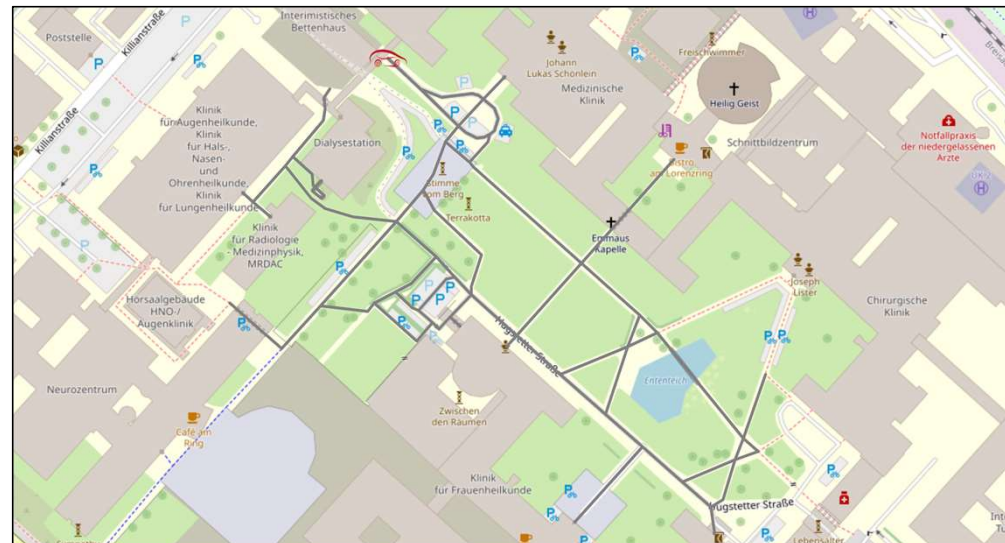

# PROJECT DESCRIPTION

## Intelligent Hospital Logistics

Visualization with moving vehicles

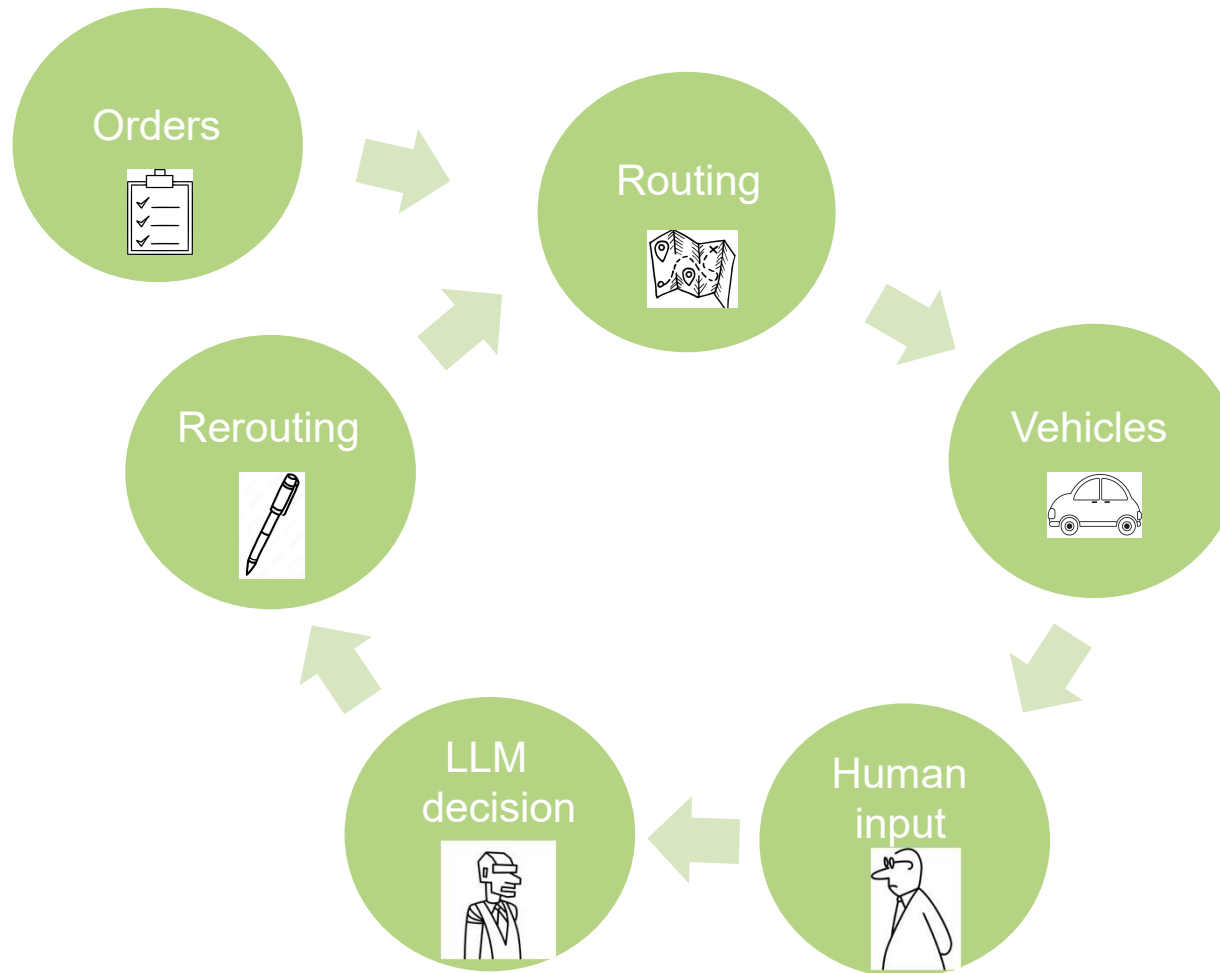

Connection of LLM and Graph

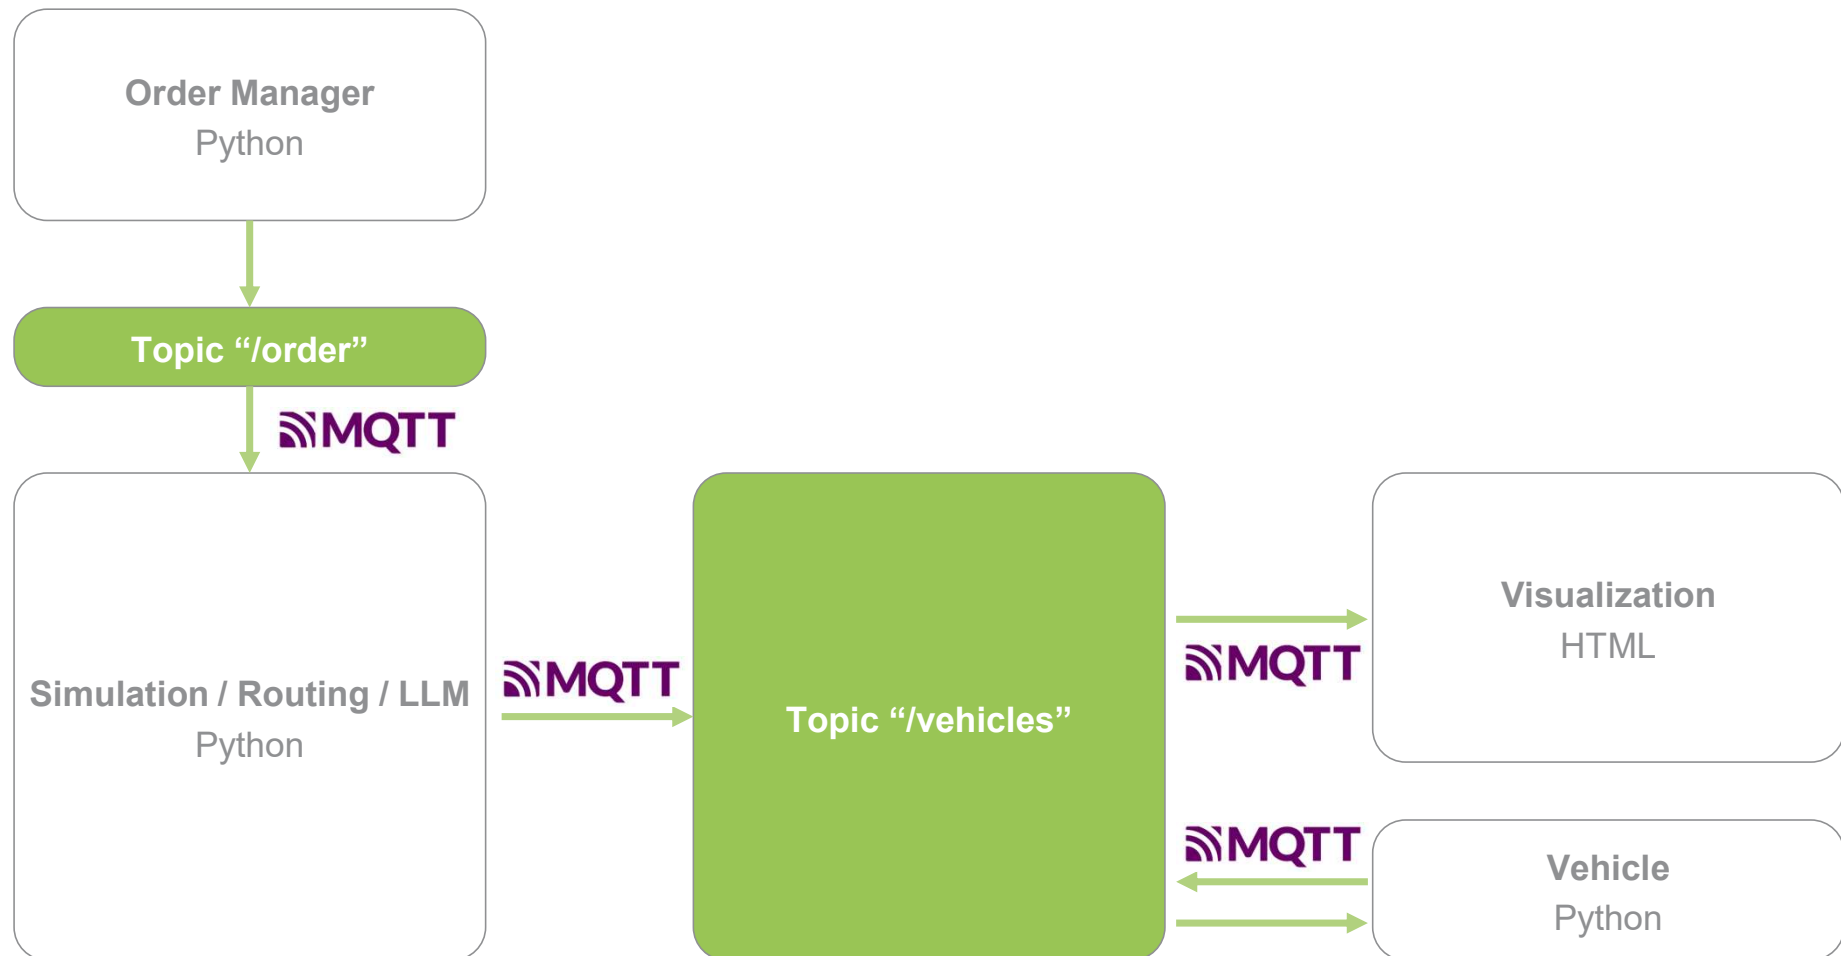

Compared different shortest path algorithms  
( $a^*$ , Dijkstra, Bellman-Ford)

Evaluation Metric: Euclidean Distance  
=> Comparison of Algorithms

# APPROACH

# RESULTS

## LLaMA2

- Meta Model
- Open-Source
- Very high latency
- Has difficulty in understanding prompts with a large number of tokens

## OpenAI Zero Shot

- OpenAI Model
- Relies on pre-existing knowledge and only the context is given
  - Task-diverse
- A small number of tokens is used

## OpenAI Few Shot

- OpenAI Model
- Giving context and a few examples of expected output to certain inputs
- More fine-tuned for certain Tasks
- Larger amount of tokens used

Ranking	Model	Accuracy
1	OpenAI Few Shot	0.9151
2	OpenAI Zero Shot	0.8393
3	LLama2	-

LLama2 not sufficient for our task

## Intelligent Hospital Logistics

### LLM

Many ducks from the nearby duck pond are blocking the road on edge\_245004115\_313158259

Submit

Are follow up questions needed here: Yes.

Follow up: Is the event important enough so that the edge\_245004115\_313158259 is not usable?

Intermediate answer: Yes, the ducks blocking the road would make edge\_245004115\_313158259 not usable.

So the final answer is: List of edges that have to be removed: edge\_245004115\_313158259. False the edge is not usable.

### Orders

order_id	source	target	items	Vehicle
0	Zwischen den Räumen	Stimme vom Berg	Blood	red
1	Emmaus Kapelle	Klinik für Frauenheilkunde	Breakfast	green
2	Stimme vom Berg	Emmaus Kapelle	Blood	red
3	Klinik für Frauenheilkunde	Emmaus Kapelle	Palenka	blue
4	Emmaus Kapelle	Stimme vom Berg	Vaccines	blue
5	Klinik für Frauenheilkunde	Emmaus Kapelle	Dishes	green

# DEMO

# NEXT STEPS

Reroute moving vehicles too

Expand current map

LLM Finetuning  
& try LLAMA again

Setup open source models on Uni server

Different vehicle/  
order priorities

Dynamic edge weights

Prompt input from Vehicles

# Thank You For Your Attention!

## Do You Have Any Questions?
